St. John's Ambulance Annual Meeting Held in Coleman

The annual meeting of the St. John's Ambulance Association was held in the High School auditorium on Sunday, October 28.

The minutes of the last annual meeting were read and approved.

The meeting approved of sending a financial statement to Edmonton, also the minutes of the annual meetings.

The financial statement was read and approved.

The annual Remembrance Day wreath will be laid on the Cenotaph by the Association.

After the business of past year was discussed an election of officers for the 1957 term took place.

The same slate as last year was adopted.

The officers for 1957 will be: P. J. Harquill, D. Young, W. Fraser, W. Goodwin, P. Melson, R. Greenhaugh, J. Rushon and E. Hill.

The president will be E. K. Hill, vice president, W. Hammer and secretary, J. Kilgannon.

Committees appointed were: Intercession Tippet, W. Hammer and G. Clarke.

School Committee: H. Bond, P. Kilgannon, M. Topak, G. Murdoch, J. Marooni, J. Lant.

Town, M. Johnson and P. Dececco.

The association will hold their annual New Year's Eve Dance. Further plans will be made at a future meeting.

Legion Dart Tourney Progresses

A change in marking points in the Legion dart league games between Coleman, Blairmore, Bellevue and Pincher Creek has been announced.

In future points will be awarded on the square system.

The standings in the league are as follows:

Coleman Legion — 105 points with 3 games played.

Blairmore Legion — 66 points with 2 games played.

Bellevue — 84 points with 2 games played.

Pincher Creek — 33 points with 1 game played.

The Blairmore Legion were hosts to the Coleman club on Thursday, November 1. Results of this game were:

1. Leo Sloman and Gladys Hunter.

2. Ray Sloman and Grace Roduzak.

3. Magnus Juhlin and Jean George.

4. Jim McDonald and Muriel Ingram.

Blairmore received 37 points from this game while Coleman gained 35 points.

On Wednesday, November 7 Bellevue visited the Coleman club. The winners of this game were:

1. Simon Sanyshen and Sophie Bianchini.

2. George Hunter and Martha Brooks.

3. Willie Connors and Katie Mottle.

4. Scotty Fleming and Laura Toz.

Points gained on this were Bellevue 41 points and Coleman 31 points.

Wins Award

Miss Bernice Bruzza of Blairmore, had been awarded the \$50 scholarship sponsored by the Ladies' Auxiliary to the Crow's Nest Pass Hospital.

This award is given yearly to the girl entering nurses training with the highest mark. Bernice had an average in matriculation of 72 per cent. She took her studies in Blairmore.

Correction

The Journal has been informed by District 18, U.M.W. of A., that the rumor concerning the possible breakaway of the Michel Union is unfounded. This rumor was published in our columns sometime ago. Our apologies gentlemen.

There is music wherever there is music of spheres—E. Waller. Bopster's weather forecast: Cool tonight, man. Crazy tomorrow.

Old Age Pensioners Plan Xmas Party

At the regular meeting of the Old Age Pensioners Association held on Monday evening plans for the annual Christmas Party were discussed.

It is to be held on Monday, December 3rd and is to be catered for by the Royal Purple. The clergy of the three churches will be invited to attend.

The other businesses of the evening was discussed. A vote of thanks was given Mrs. A. Bucka who is holding a variety concert, half of the proceeds which are to be given to the Old Age Pensioners Association.

Mrs. N. Goulding, president of the association welcomed Mr. A. Wood of Kenora, Ont., who is visiting in Coleman.

Following the business meeting a variety of films including Coleman Rodeo Parades and events were shown by Mr. D. Young. He also showed a very beautiful film of Honolulu which he took when he and Mrs. Young visited there. These were very enthusiastically received by the assembly.

Following the very enjoyable film showing a lunch was served

Coleman Resident Passes

Mrs. Gordon Woods, 54, passed away in the Crow's Nest Pass Hospital on Saturday, November 10 after several months' illness.

Born in Scotland, she came to Coleman in 1942, and was in charge of the East Kootenay staff house, where her husband is employed.

She was a member of the Eastern Star and a member of the United Church.

She is survived by her husband Roy (two sisters (Janet) Mrs. A. Dicken, and (Margaret) Mrs. S. Wheeler, both of Fernie. Another sister, Mrs. Percy Kingston predeceased her in 1952.

Funeral services were conducted from St. Alban's United Church on Wednesday.

Remains were forwarded to Fernie where interment was made in the family plot.

Down the Deepest First To Get Out

SPRINGHILL—The man who was down the deepest in the mine when the explosion occurred was among the first of the trapped miners to be brought out of the pit alive.

He was Philip Brown, only 19 and a miner for only a few months. He was working on a pump at the 8,100 level, more than 1½ miles below the surface of the earth.

He found his way quickly and without difficulty to the 4,400 level, where he bumped into the first gas fumes and smoke, and was among the 23 men who held up at this level and took advantage of a supply of compressed air.

"I'm too young to die, so we'll get out of here," he kept telling his fellow trapped miners. His high spirit and courageous attitude throughout the long hours of waiting drew high praise from other survivors.

Philip Brown is a nephew of Mr. E. Lonsbury of Coleman.

Pushing out the other side

Pressure of bank control against expenditures on real values as involved in lots and houses is likely to make available more money than would otherwise be the case for the purchase of cars, TV sets, appliances, furniture and furnishings, apparel, jewellery, gadgets and luxuries.

These items all are moved with the help of extensive newspaper advertising—more so than houses—and for a time, at least, both in the United States and Canada the slow-down in housing could cause a step-up in advertising with consequent stimulation of the market for newspapers.

Start \$5,000,000 Steel Smelter 'Within Days'

The construction of a \$5,000,000 steel smelter at Burmis, at the eastern end of the Crow's Nest Pass will get under way in the next few days, it was learned Tuesday night from W. A. Kovach, Social Credit member of the legislature for Pincher Creek-Crowsnest.

Mr. Kovach told the Albertan that drilling for the footings of the smelter would begin in a day or two. He said the new industry would result in the Crow's Nest area becoming the "Little Pittsburgh" of Alberta.

Announcement that the smelter was planned was carried by the Albertan Monday following consultations in Calgary between a French banking and industrial group and J. A. Brunet, president of West Canadian Petroleum, affiliated company of West Canadian Collieries, which has extensive coal interests in the Pass.

Tuesday night Mr. Brunet was not available for further comment.

Mr. Kovach said the people of the Crow's Nest Pass area were jubilant at the news. "I just heard today that they are going right ahead with the project," he said.

One consideration upon which the smelter to employ about 250 persons, was predicted, was the government aid in procurement of leases and permits would be required.

"I am quite certain that the government will co-operate wholeheartedly in this respect," Mr. Kovach declared. He added: "such a project as this will provide much needed stability for the area. It will boost the morale of the people and provide the nucleus for greater development of resources in the area."

He pointed out that the economy of the Pass has been "distressed" in the past few years and that the future of the area had been in the balance.

Mr. Kovach revealed that there was a question to the iron ore in the Crow's Nest area that made it difficult to process using the present Canadian methods. He declared that tests had been carried out in Norway last year and the French group behind the Burmis development had evolved an economical process to smelt the Alberta ore.

The M.L.A. who personally goes prospecting and is familiar with ore deposits in the area, also stated that rock containing silver was there in quantity and that

traces of copper had been found. There was also phosphate for use in fertilizer manufacture which could replace supplies now being brought in from the United States for mixture with nitrogen extracted from gas at the Medicine Hat plant of North West Nitro Chemicals.

Finally certain to be built is a 30 mile extension to the CPR spur line which runs from Brocket to the Pincher Creek gas field. This would extend to Waterton and provide the means of transporting ore from various deposits to the Burmis smelter. Mr. Kovach said Nelson Crippen, president of the CPR had visited the area over the week-end to assess the situation.

The M.L.A. pointed out that he has been making proposals to the Alberta Industrial relations board over the past five years in an effort to alleviate the stress caused by the loss of coal markets in the Pass and that mining development had been one of his main concerns.

Railway transition from coal to diesel operations had hit the Pass hard.

The mayors of Pass communities were equally enthusiastic.

Mayor Frank Abousaffy of Coleman told the Albertan: "This will certainly bring this area from being in a financial balance to one of solid economy." He foresaw related industries developing, such as machine shops, increased lumbering and the possible establishment of a cement plant. This latter development has been forestalled because there is insufficient population to support it.

It is also learned that the provincial government has been undecided about what to do with large stands of timber in the district—whether to give the licence to one big operator or split it among several. From this development may come that answer.

Mayor William Gray of Blairmore, eight miles west of Burmis, declared: "This is a shot in the arm for the people of the Crow's Nest Pass. Right now things are looking quite well—better than they have had for some time." He added that it would help the whole economy and that coal processing would probably increase in importance, with the greater development of by-products. "It's sure got our people talking," he said.

Bellevue, Hillcrest and Frank are other Pass communities the economy of which will be boosted by the advent of the smelter.

Coleman Hit by Bad Wind Storm

A terrific howling hurricane or shall we say, chinook wind, struck throughout Southern Alberta last Friday. Motorists returning from the East ran into difficulty driving owing to the dust from plowed fields making visibility difficult.

Coleman received its share of this gale, considerable damage being done to the roof of the Elks hall. A garage under construction on the hill adjoining what is known as the Colley residence, split in half, one complete section of wall landing in Mr. W. Burrows yard breaking down a lilac and crab apple tree which were beauty spots when in bloom and causing damage to the fence of Slim Williams. Mr. Burrows had just a few minutes before entered his home or might have received bad injuries. A number of windows were blown out in town and other property damaged.

Calm came in the early hours of Saturday morning without anyone receiving bodily harm and it was indeed "The calm after the storm."

Coleman Elks Hold Ladies' Night, Officer Installation

Coleman Elks along with their wives and lady friends, the Ladies of the Royal Purple, gathered in the Elks' Hall, Saturday evening, November 10 for a social evening and installation of officers for the 1957 term.

DGGER L. Barr of Port Macleod was the installing officer, ably assisted by Bro. Jim Coutts and the Port Macleod Patrol Team. Officers installed were:

Exalted Ruler—Bro. H. Nelson. Leading Knight—Bro. R. Triffin. Loyal Knight—Bro. S. Waveman. Lecturing Knight—Bro. H. Collins. Secretary—Bro. J. M. Rushon. Treasurer—Bro. A. Wilson. Inner Guard—Bro. G. Taggart. Tyler—Bro. H. Raymond. Esquire—Bro. S. Oslosky. Chaplain—Bro. N. Ash. Historian—Bro. J. Wilson. Organist—Bro. B. Bond. Trustees—Brothers H. Oate, C. Freeman, and D. Ennis. I.P.E.R.—Bro. W. Dutil.

Following the installation, all members and friends present enjoyed a buffet supper served by the brother Bils. Dance music was supplied by the Ed's orchestra.

We heard an interesting phrase the other day to do with bringing up children. It was "intelligent neglect." In other words a lot of us tend to fuss too much over our children. Kids develop best if they have to rely on their own resources, work out problems for themselves. So don't keep them tied to your apron strings. Let them wander off by themselves, leave them to themselves, sometimes even to get into some trouble or come back with a bruise or cut. It's all part of the lesson of growing up.

POLISH COMBATANTS HONORED

I am pleased to have an opportunity to extend greetings to the members of the Polish Combatants Association through the pages of this brochure which has been prepared on the occasion of the Association's 10th anniversary.

Ten years ago Canadians welcomed to our land thousands of veterans of the Polish forces who side by side with our own sons and daughters had been fighting to keep freedom alive. In the years which have followed there has been no cause to regret the spontaneous enthusiasm which greeted the decision of the Canadian government to make this, the first post-war migration possible. Not only have your members enriched our way of life by adding to it the great cultural heritage of the Polish nation, but you have also played your full part, most of you now as Canadian citizens, in the amazing progress our nation has been enjoying.

To each of you I offer my warmest congratulations on this anniversary and my sincere good wishes for the future.

LOUIS ST. LAURENT,
Prime Minister.

Legion Commemorate Remembrance Day

Beautiful weather favored the Coleman Branch of the Canadian Legion on Sunday, November 11 when the annual Remembrance Day was observed.

A large congregation gathered in the Roky Theatre at 10:45 when the services under the direction of Com. R. Crippen started.

The flag party presented the colors after which "O Canada" was sung.

The invocation by Rev. R. MacAuley was followed by the two minute silence.

Mayor Frank Abousaffy, chairman of the services addressed the assembly and once again brought to the minds of all the true meaning of Remembrance Day.

The memorial prayer by Rev. MacAuley was followed by the Hymn "O God Our Help in Ages Past" sung by the choir under the direction of Mrs. R. Cousins.

The heart-stirring tableaux by Co. R. Crippen hit hard at the memories of all and recalled the loved ones to mind very vividly. The playing of the trumpet by J. Lowe and drums by H. Parkinson helped to create a very solemn moment.

Roll calls of World Wars I and II by J. Kuliz and P. Hirst were called.

J. Kuliz recited the Lord's Prayer, followed by the hymn "O Valiant Hearts" sung by the choir.

Mr. J. McDonald read the scriptures. Mr. Dave Young then gave a very fine speech on the Remembrance Day observances and stressed the need of peace in a troubled world.

The Hymn "Abide With Me" preceded the Legion President M. Drew's address. He stressed what the Canadian Armed Forces had sacrificed that we may live in a peaceful world.

Mayor F. Abousaffy then said a prayer that the world might find peace and be able to maintain it in the future.

"The Queen" was sung by the choir and congregation and with the retiring of the colors another Remembrance Day was observed.

Leaving the theatre a parade consisting of two Mounted Policemen, Drummer A. Galbraith, Guards and Flirt Party of the R.C.E.M.E. and R.C.E.M.E. personnel, Canadian Legion Ladies Auxiliary, Cadets and cubs under the direction of Sergeant Major J. Mysliki paraded to the Cenotaph where wreaths were laid by various organizations and individuals.

A salute was fired by the R.C.E.M.E. squad while J. Lowe played the Last Post.

Reverend P. Dykes and the Benediction at the Cenotaph in honor of all the fallen in both World Wars.

• Yorkton (Sask.) Enterprise delves in the Regina Manifesto business: "Now Mr. Douglas, once a red-hot socialist, in theory at least, says he does not favor government ownership of anything for its own sake. He is interested in results, as measured by the welfare of the people. The socialist has become a pragmatist. He could not be anything else and hold office for long in a province of farmers and a nation which has repeatedly rejected socialism."

• As one of the young patients in the Alberta Red Cross Crippled Children's Hospital looks on, Mrs. T. F. Crowe, first president of the Children's Hospital Aid Society in 1946 cuts a strand of ribbon to open the new solarium at the hospital. Construction and furnishings of the solarium, costing \$37,000.00 was paid for by the hospital aid from proceeds of their annual Easter Seal campaign. Pictured with Mrs. Crowe are, left to right: Miss Florence Reid, director of public relations at the hospital; Mrs. Stewart Adams, President of the Hospital Aid and Mr. M. G. Graves, F.C.A., chairman of the hospital board.

KANGAROO RAT—Shown above is one of the pair of live Kangaroo rats now on display at the Saskatchewan Museum of Natural History. Eight live rodents were captured alive by Dr. Robert W. Nero, museum assistant director and Richard Fyfe, museum extension officer when they visited active colonies of Kangaroo Rats in sand dunes near Sceptre, Sask.

Active Kangaroo rat colonies found in Sask. southwest

Active colonies of Kangaroo Rats were found in the Great Sand Hills of Saskatchewan's southwest "desert" during a recent museum expedition there, Dr. Robert W. Nero, assistant director of the Saskatchewan Museum of Natural History, reports.

Dr. Nero, accompanied by Richard Fyfe, museum extension officer, after addressing a teachers' institute at Pelly, visited the sand dunes southwest of Sceptre during September and found them harboring hundreds of Kangaroo Rats.

The discovery of the colonies was made by a naturalist farmer, Frank Bushnell of Sceptre, who corresponded with the museum following a newspaper article on the discovery of a dead Kangaroo Rat at Portreeve in July, 1955. This rat was only the third specimen previously found in Saskatchewan.

Accompanied by Mr. Fyfe and

First Metis Co-op at Green Lake

The first co-operative in the Green Lake Metis Settlement was incorporated and registered July 17th.

Known as the Green Lake Settlers' Co-operative, Limited, Green Lake, Saskatchewan, the first co-operative venture of the Metis people is that of a general store, mainly groceries and sundry items. It is presently located just outside the hamlet of Green Lake.

"This is the first time that the Green Lake Metis have inaugurated a program entirely on their own initiative," John McIntosh, deputy minister of municipal affairs, commented.

The new co-operative is purchasing the majority of its supplies from Federated Co-operatives Limited in Saskatoon, through the Co-op store in Meadow Lake.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or smile? Don't be annoyed and embarrassed by such conditions. PASTERE, an alkaline (non-salt) powder to sprinkle on your plates, keeps false teeth more firmly set. Gives confident feeling of security and added comfort. No gummy, soapy, salty taste or feeling. Get PASTERE today at any drug counter.

A new look at summerfallow

So accustomed over the years has the average farmer in Western Canada become to the practice of summerfallowing, that any suggestion to the effect that he might be able to get along without it will have to be accompanied by clear and unmistakable evidence, that it would pay him to follow a system of continuous cropping or a summerfallow-free rotation. Certainly, the opinion of many leading agronomists is veering more and more to the firm belief that, in areas where rainfall is not a limiting factor and where there is no weed problem which cannot be met with chemicals, the summerfallow operation can be largely eliminated. More than that, they say, continuous cropping in such areas, when it is accompanied by the proper use of phosphate and nitrogen fertilizer can mean higher yields and even when moisture is deficient, if the shortage is not too severe, a high nutrient status will largely offset the moisture deficiency, the fertilized crops making more efficient use of the available moisture.

The matter of costs is, of course, an important one and it is recognized that a point is reached beyond which it does not pay to apply more fertilizer if maximum dollar returns per acre are to be realized. Eventually perhaps when the matter of costs and probable returns per acre are better understood and when there is more certainty about being able to deliver all the wheat that is raised, more and more farmers in parts of Western Canada will explore the possibility of eliminating summerfallow and of growing cereals and other crops more or less continuously, having regard to suitable rotations and adequate fertilization of the land. Any change in the system followed at present, however, is likely to be a gradual one.

Strictly Fresh

A parachutist was arrested for reckless driving, but a friend bailed him out.

A calf in California has been named Elvis Presley because, says the owner, "The animal has been bawling since it was born."

One political observer started watching Hawaiian hula dancers.

Said he was told to keep an eye on the grass-roots movement.

Prestige is what you try to keep up with the Joneses in so that you won't be without when the only thing that'll carry you through is...

Wonder if they'll ever come out with a king-size filter with a tobacco tip.

On The Side : E. V. Durling

Turf expert Pete McEvoy, the Brooklyn expatriate, who now lives in California, is still driving a Cadillac sedan he purchased in 1928. Pete has made 15 round trips between Brooklyn and Los Angeles in this car. Also worthy of note is that he has been driving automobiles since 1913 and has yet to receive a ticket for any kind of a traffic violation. Not even an overtime parking ticket. Some record for 43 years of driving.

Open for discussion

What is the origin of the saying, "The Life of Reilly"? That is a question that has often been discussed but never settled. Some claim it has a reference to a hotel keeper named Reilly, which is an error. The hotel keeper they are thinking of was named O'Reilly, as in the song, "Are You the O'Reilly That Keeps the Hotel." Others say it has to do with a man who was very friendly with a certain Mrs. Reilly while her husband was off on a trip. It was said of this man that he "lived the life of Reilly while Reilly was away."

A hint for husbands-to-be

Do women want to be dominated by their husbands? Or does the average wife want to rule the roost? That is a question constantly discussed. According to our horses and women experts, the average wife welcomes a degree of domination. She wants to have her say in the management of the household. But doesn't want the last word. She wants a man who will make decisions and take responsibility. If you are contemplating matrimony young fellow, keep that in mind.

A quiz question

Are you in shape to win a jackpot on one of those quiz programs with general information as a category? If so, what is the largest army in the world? Ninety percent of persons asked miss out on that one. Answer is: The Chinese army with five million members. Second is the Soviet with over four million. Third is the United States with under two million in the armed forces.

Musical appreciation for males

"I may be forty but I still rate whistles." Women who have retained their youthful figure frequently say that, or words to that effect. I have also noted shapely beauties described as having a "whistle figure". However, whistling as an attractive female passes by is rated a breach of etiquette. Perhaps it shouldn't be. Consider what a morale builder a few whistles are to some women. Perhaps the etiquette experts can be persuaded to approve of a discreet complimentary whistle. Also some enterprising manufacturer should make a whistle to use as a means of expressing admiration for a passing female. A whistle with a long, low, sweet tone.

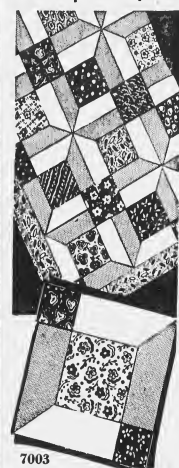

"Sacking" the southpaw

Is a left-handed first baseman more valuable to a team than a right-hander? In my opinion he is not. The claim of the supporters of southpaw initial sackers is that such first basemen are better qualified to figure in plays calling for throws to other bases. That is too slight an advantage to merit consideration. Right-handers are steadier than left-handers, who are usually temperamental and easily rattled. They are also inclined to fancy "show-off" playing such as overdoing the one-hand catch.

Three-patch quilt

7003
by Alice Brooks

Use up scraps of fabric—make a gay patchwork quilt this easy, thirty-way! Make pillows too, for summer lounging on porch or lawn. Three simple patches—repeated, form a lovely design.

Pattern 7003: Pattern, charts, directions for three-patch quilt.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted):

Household Arts Department,

Department P.P.L.,

611 Front Street W., Toronto.

Two FREE patterns—printed in the New Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—also easy, fast-to-make, hand-sewn! Send 25 cents for your copy of this wonderful book right away!

ROAD TOLL STILL RISING

Saskatchewan may be heading towards a new but unenviable record in 1956—a record number of highway deaths in motor vehicle accidents. By the end of August, more than 60 persons had met death on the road in the province, representing a major disaster for relatives, friends, and the province as a whole.

During the past decade, almost 1,000 persons (equivalent to the population of an entire town) have perished on Saskatchewan's streets and highways. And highway traffic officials point out that, if the rate of fatal accidents continues at its present level, another 1,000 will have been killed by 1964.

NEW PRINTED PATTERN EASIER—FASTER MORE ACCURATE

Each One Yard 54"

4762 10-18

PRINTED PATTERN

It's our new PRINTED Pattern! What a sewing buy for you! ONE yard 54-inch fabric is all you need for each of these styles: short-sleeve blouse, jerkin, and skirt.

Printed Pattern 4762: Misses' Sizes 10, 12, 14, 16, 18. Blouse, jerkin, skirt; each take 1 yard 54-inch fabric in all given sizes.

Directions printed on each tissue pattern part. Easy-to-use, accurate, assures perfect fit.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this Pattern. Write plainly: Size, Name, Address and Style Number and send orders to:

U.S. sell farm produce to Japan

The United States has agreed to sell another \$65.8 million worth of farm produce to Japan for Japanese currency, bringing to the total foreign currency sales to that country to \$150.8 million. Included in the latest sale for yen are 17 million bushels of wheat, worth \$27.3 million, 4.5 million bushels of barley valued at \$4.8 million and 5 million bushels of corn and other feed grains costing \$6.4 million.

IN THE HOME WORKSHOP

Novel table

This novel table and the bunny chairs will make your children's dining and play time the gayest in town. Where there are no children in the house the table will make an interesting coffee table for a game room or terrace. These

pieces are made from three-quarter inch solid stock and the bunnies are traced directly onto the wood from the pattern, which also shows exactly where to place each shade and color for realistic effects. See sketch for pattern numbers and enclose 35c for each pattern ordered.

They might fool you

These decoys are "big as life and twice as natural"—beautifully rounded and water-proofed in realistic colors. Yet, they are easy to make by building up wood sections

that are no trick to cut. Pattern 404, which gives actual-size guides and shows every step, will be mailed for 35c. It is one of five patterns in the Sportsman's Packet for \$1.50.

The Sports Clinic

(An official department of the Canadian Amateur Sport and Physical Fitness Development Service)
By Lloyd Percival

How to improve your passing

Many football players fail to develop into really good passers simply because they lack the strength and power, particularly for the long throw. Speed, timing and accuracy depend to a large extent on properly developed throwing muscles.

Almost every passer in the high school category can afford to spend extra time developing and strengthening the muscles he uses in the throwing action. And here's one excellent way to go about it. Simply practice passing from a kneeling position—get a teammate, kneel down about 20 feet away from him, and start throwing the ball back and forth. Gradually move apart until you are throwing 20 to 25 yards.

The reason this is so effective is that it throws almost the entire load on your throwing muscles, and is, in effect, a develop-

ment exercise.

Speaking of development exercises, another good one if you have the facilities is to lie on your back and raise as heavy a barbell as you can handle with safety directly over your shoulders. Then move your shoulders upwards, forwards and down again. Keep working at this until tired. This drill develops the muscle along the side of the chest just in front of the armpit which is so important in the passing action.

Do you react fast?

A goaltender in hockey has to be fast, agile, flexible and courageous—and his reflexes have to be sharp as a razor. That's why every goaltender should get to work right now on drills that will improve his reaction time, because this is one thing he can do a great deal for before the regular season opens.

Here's a drill that will really do a job. Have a partner stand about 10 feet away and throw a tennis ball to your right and left, high and low. You stand with your eyes closed and as he throws he yells "now!" The idea is to open your eyes when he shouts and try to catch the ball. Start slowly and have him gradually increase the speed of his throws.

This is an effective drill because it teaches you to react very quickly to a situation very similar to a shot in hockey. Practice it regularly between now and the start of your hockey season and you'll be surprised at how much sharper your reflexes will become.

The Canadian Amateur Sports and Physical Fitness Development Service is a nationwide project operated by Sports College to improve standards of sports and physical fitness. This newspaper is pleased to participate in this service by presenting The Sports Clinic. Further information about Sports College and CASPFDS may be obtained by writing to Sports College, Box 99, Toronto, 1, Ont.

PAJAMA GAME—Wearing pajamas and socks seems somewhat puzzling to this sleepy-eyed specimen of man's best friend. The fuzzy fellow is an Old English sheepdog named Reciever Sugar Bush (honest). He slipped into nightwear for his appearance at an Old English Sheepdog Championship Show.

WEEKLY BIBLE COMMENT

THERE WAS WAR IN HEAVEN

"There was war in heaven." Surely heaven is the last place where one would expect war. It is a common assumption that, if we could only perfect our social conditions and environment, everything would be well. Yet here in heaven, where we think of conditions as ideal, there was war. We are reminded that as eternal vigilance is the price of peace, so it is the price of liberty. Good conditions do not guarantee suppression of evil ambitions and the lust of power.

"There was war in Heaven." Even in heaven, the forces and the power of evil could not be overthrown without conflict. There is a point where the appeals of grace, overcoming evil with good, and turning the other cheek, have their limitations, and the power of evil has to be met with uncompromising opposition. The Christian way is a way of peace, but Michael and his angels went forth to war and there was no peace until the great dragon was cast down and forced out of heaven.

Surely there is a parable in this for our own time. A good woman recently wrote me to protest against our plans of defence and military preparation on the plea that "war is senseless." Of course war is senseless. It is worse than senseless; it is criminal.

But must we not make a distinction between a senseless war and the force that law-abiding and peaceable men would use in suppressing crime and in meeting invasion or the threat of invasion? When the Christian, however, wars for any thing but righteousness and peace, his warfare is not of God but of the devil.

TRAVELLING INFECTION

Infections on other parts of the body may affect the eyes. An abscessed tooth, infected tonsils or nose may cause eye trouble. A checkup by a medical eye doctor will reveal these conditions and permit diagnosis and treatment. On the occasion of a medical examination, the eyes, ears, nose and throat should be included. 3216

MOSCOW SEES NEW U.S. CAR—Curious Moscow residents look over a 1957 Ford sedan near the Kremlin ahead of the new car's unveiling in the United States. This was one of eight Fords sold to the U.S. State Department at \$1.00 each and flown to Moscow from Detroit.

SEVEN-YEAR-OLD Larry Johnson, of Yale, Okla., looks at the Yo-Yo he swallowed while playing it. He was rushed to hospital where doctors removed it.

Saskatchewan represented at conservation conference

A group of Saskatchewan Natural Resources officials returned recently from the International Association of Game, Fish, and Conservation Commissioners.

Held in Toronto, the convention was attended by Game, Fish and Conservation officials from all parts of Canada and the United States.

Headed by J. W. Churchman, deputy minister of Natural Resources, the Saskatchewan delegation was comprised of Game Commissioner E. L. Paynter, George Coulbourn, assistant director of fisheries, M. Atton, chief fisheries biologist, Dr. D. S. Rawson, professor of biology of the University of Saskatchewan, J. Johnson, regional fisheries supervisor and E. C. Nicholson, supervisor of the Conservation Officers Training School in Prince Albert.

The group attended a series of lectures at the three day convention, which included such titles as "Hunter Safety Education" and "The Future of Wildlife and Recreation in Canada."

Discussion groups were held on such subjects as: "Pollution and Wildlife Conservation," "Wildlife versus Power Projects and Industrialization," and "Water for Wildlife in the Multiple Land Use Concept." Mr. Churchman was chairman of a panel discussion on "Water in Relation to Wildlife Conservation."

In addition to the lectures and discussion panels, members of the

delegation were taken to visit the Conservation Officers Training School at Dorset, Ont., while others visited a research station at Maple, adjoining Toronto. The group also made an inspection of the Medhurst Forestry School. All the Saskatchewan delegation spoke highly of the courtesy and welcome given them by the Ontario officials who "went out of their way" to show them every aspect of the Ontario resources program.

Quick trick for the kitchen

Pineapple-Mint Sauce

Here is a sauce with a minty, sweet-flavor that is good for either hot or cold lamb. Combine 1/4 cup brown sugar with 1 tbsp. cornstarch. Mix well. Add 2 cups pineapple juice, 8 drops mint extract and 2 tbsp. lemon juice. Cook until mixture boils. Or just chop or grind fresh mint leaves and measure 1/4 cup. Mix together 1 tbsp. sugar and 1/2 cup mild vinegar. Boar over mint leaves and allow to blend for 1/2 hour in warm place.

Quick Canadian Quiz

1. What waterfall in Quebec province is 100 feet higher than Niagara Falls?
2. In 1939 the average payment in sales and excise taxes on a new Canadian automobile was \$65. What is today's average payment?
3. Excluding defense spending, what is the largest single item of expense in the federal government's budget?
4. Which of the provinces has the largest Indian population?
5. About 800,000 Canadians are now employed in agriculture. How many are employed in manufacturing?

ANSWERS TO QUICK QUIZ

5. About 1,300,000.
3. Family allowance payments.
1. Montmorency Falls, near Quebec City.
4. British Columbia.
2. About \$450.

The wave-length of light determines its color.

Saskatchewan now has over 2,000 oil wells

During August, the number of Saskatchewan oil wells capable of being operated passed the 2,000 mark according to statistics contained in mineral resources department reports. By August 31, the total of oil wells capable of being operated in the province had reached 2,046, while there were 142 wells capable of being operated.

Fields listed as having one hundred or more producible wells included Coleville-Smiley, with 478; Lloydminster, with 270; Lone Rock, 162; Cantaur, 153; M. Isle, 143; and Steelman, 121. The latter two fields are in the province's light oil area in the southeast.

Paying back

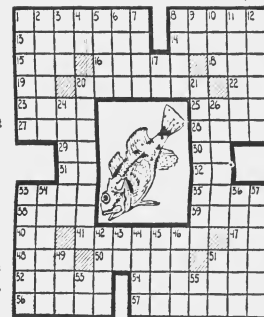

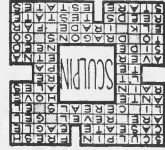

British old-age pensions follow the pensioner to the ends of the earth and the end of his days. If he migrates at age 65 to Tasmania, Peru or the Yukon, the cheques continue to flow and don't stop until the death certificate is issued. Canadian old-age pensions should be payable in the same way because they too are based on the principle of contribution.

"Dollars and Sense"**How can YOU benefit from having a Current Account?**

You'll find it much easier to keep an accurate record of your current expenses when you have a Current Account.

When you pay all bills by cheque on your Current Account, you receive back, at the end of each month, all your cancelled cheques as well as a bank statement showing every withdrawal and every deposit you have made. Furthermore, they are much easier to file away than receipts and take less room to store. With them and your bank statements, you'll find it far easier to get an exact picture of how you spend your money.

So it's a good move to use a Current Account for paying all current bills—and keep your Savings Account for actual savings.

Newsprint outlook

Opinions differ as to the medium term outlook for newsprint although most agree that supply is likely to catch up with demand either in 1957 or 1958. The difference of opinion has to do with the duration of this easier supply situation. Some operators forecast an oversupply at least until 1960.

Others are impressed by the forecasts of United States publishers that in the next 10 years their requirements will increase 40 per cent. If that forecast is correct and if the increase is fairly constant through the 10-year period, the next four years would see a good deal of the increased tonnage taken under long-term contract in protective orders well ahead of capacity increases.

Newsprinters need not take the quantities of newsprint they cover with orders of intent, but if their anticipations are not out-running reality, the cancellations might not affect much tonnage. Of all forest products, newsprint still seems to have the strongest basic market position.

The Liquor Control Act**Application For Hotel Beer Licence**

Public notice is hereby given that the undersigned intends to apply to The Alberta Liquor Control Board for a Licence to sell Beer by the glass or open bottle, for consumption on the licensed portion of the premises, and also to sell Beer by the unopened bottle for consumption elsewhere than on the licensed premises, in conformity with the provisions of The Liquor Control Act and the Regulations made thereunder, with respect to the following described premises:

Beer Salesroom on the south-east end of the ground floor of the Hillcrest Hotel, situated on Lots 6 to 9, inclusive, in Block 33, Plan Hillcrest 5150 S. Hillcrest, Alberta.

Dated at Hillcrest, Alberta, this 9th day of November, 1956.

"John Bianchini"

Applicant.

Any person wishing to protest against the issuance of a Beer Licence to the applicant should notify the Alberta Liquor Control Board, Edmonton, Alberta, in writing, within thirty days of the date shown at the foot of this advertisement.

World Happenings In Pictures

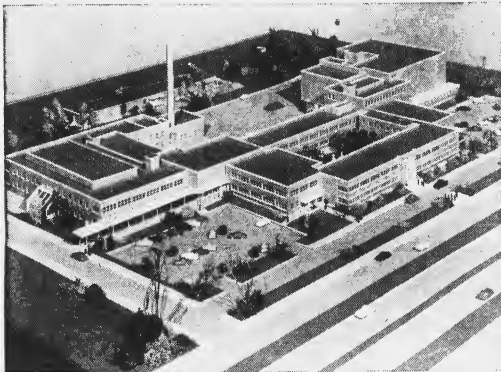

WORLD BANKERS MEET IN WASHINGTON—Antonio Carrillo Flores, left, chairman of the 60th annual meeting of the World Bank and International Monetary Fund, meets Robert L. Garner, president of the newly-organized International Finance Corp. In a speech before delegates and guests at the 11th Annual meeting in Washington, Mr. Garner, said the scene is set for unparalleled economic growth in less developed areas of the world.

PARISIAN PONCHO—Hubert De Givenchy sees the season's popular cape as a poncho—a voluminous length of mustard-and-gold-checked wool that wraps and buttons at one shoulder. There is a single slit at one side for the arm.

END OF THE ROAD—A quick way to dispose of troublesome cars is provided by this huge hydraulic press at the German Lindemann factory at Duesseldorf. Built for a British steelworks, the 230-ton press can change auto bodies into neat, small bundles in a matter of minutes. The cars are dumped in the press, top, and after a flick of the switch, emerge in the form of a two-by-three-foot scrap block, bottom. The machine is reportedly the biggest "scrap parceling press" in the world.

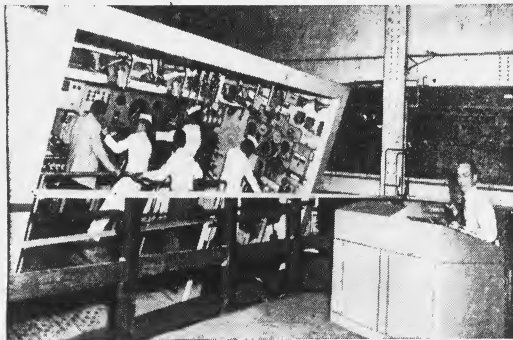

OFFICIALLY OPENED—The new \$5,250,000 National Film Board Building was officially opened in Montreal when Immigration and Citizenship Minister J. W. Pickersgill turned the golden key to open the doors. Some 500 staff members and millions of dollars worth of equipment were transferred from nine separate buildings in Ottawa to the new location. The purpose of the NFB is to design and produce films to interpret Canada to Canadians and other nations. How well this job is being done is shown by the fact that over 175,000,000 people saw its productions last year.

SHINGLE SHIFTER—All up in the air over his work is Jackson Davis, of Arlington, Va. Above, he repairs loose shingles on the steeple of a Washington, D.C., church. Davis, an employee of a roofing and sheetmetal company, is suspended in a wooden basket seat from a huge crane.

KAY HENSHAW, 18-year-old student from Burlington, Ont., is selected Queen of the Niagara grape festival at St. Catharines. Fourteen girls competed.

NAVY ROCK 'N' ROLL—Submarine trainees have an opportunity for dockside seasickness in the Navy's newest electronic device—the Universal Submarine Simulator. The operator, right, has fed a problem into a computer whose signals have actuated the Simulator into making a pronounced pitch—such as might take place in heavy seas or in making a high-speed turn. The operator can rock 'n' roll the Simulator to angles of 45 degrees, and can duplicate sea conditions from dead calm to hurricane force. Student submariners thus run the gamut of submarine operating conditions before they ever step aboard one of the Navy's undersea vessels.

OPERATION HUSH—A trio of improved jet engine silencers, latest equipment for use in a noise-abatement program, are coupled with three F-84F Thunderstreaks during engine tests at a New York field. The silencers have proved so efficient that ground crewmen can carry on a normal conversation when tests are being conducted.

EGYPTIAN STAMP marks canal seizure. This stamp, commemorating nationalization of the Suez Canal by Egypt, went on sale in Egypt Sept. 26, just two months after the canal was seized. It bears a map of the canal with land areas sand-colored and sea areas blue. In French and Arabic are the words: "Nationalization of the Suez Canal Company: Freedom of Navigation Guaranteed."

WORLD'S OLDEST LIVING MAN?—Javier Perera is reputedly the world's oldest man—at the tender age of 167. The wrinkled, pint-sized South American Indian from Bogota, Colombia, stands four feet four inches tall and weighs 75 pounds. He was flown from Barranquilla, Colombia, to the United States for an intensive scientific study on his condition at the Cornell Medical Center, Ithaca, N.Y. Above, Javier, who may have been born in 1789, calmly eats an ice cream cone in Miami, Fla., first stop on his trip to Cornell.

Diabetic society functions given

Functions of the Diabetic Association are outlined in an article especially prepared for the current issue of Health Magazine, official publication of the Health League of Canada.

The Association cannot do much for the diabetic who is already in a serious condition, but it can and does a tremendous amount to help diabetics of today and of the future. The way it promotes good health across Canada is by:

1. Encouraging early detection of diabetes—a urinalysis should be a part of every medical check-up at no extra cost.
2. Having instructions available immediately upon detection, both regarding methods of injection, sterilization and purchasing of equipment, and regarding variations of diet within the doctor's prescription—yet within budget and taste of the individual diabetic.
3. Having the necessary food, injection equipment and testing materials given free to low-income and indigent diabetics.

4. Aiding research projects regarding possible prevention and better treatment of diabetes.

The Diabetic Association was formed some seven years ago, under the leadership of Dr. C. H. Best, co-discoverer of insulin, so important now in the treatment of diabetes, and Dr. A. L. Chute, Physician in Chief of the Hospital for Sick Children. The two doctors called together a group of diabetics and parents of diabetic children and asked them to form a Diabetic Association.

A charter for the group which grew from these early meetings was granted in 1933. Prior to this there had been no such body in the whole of Canada. There are now branches of the Association in every province with the exception of Prince Edward Island, and Manitoba.

GEMS OF THOUGHT

SELF-RESPECT

Every one stamps his own value on himself.

—Schiller.

Self-reliance and self-respect are about as valuable commodities as we can carry in our pack through life.

—Luther Burbank.

Man is free born: he is neither the slave of sense, nor a silly ambler to the so-called pleasures and pains of self-conscious matter.

—Mary Baker Eddy.

Neither esteem anything as of advantage to thee that shall make thee break thy word or lose thy self-respect.

—Marcus Aurelius.

Resolve to be thyself, and know that he who finds himself, knows his misery.

—Matthew Arnold.

Canada, with a population of some 15 million, consumes 25 percent of all United States commercial exports. The U.S. buys about 60 percent of all Canadian exports.

Scientists become frogmen in search for oil in Gulf of Mexico

Frogmen on floor of ocean seek specimens to be tested by geologists.

By GLOVER BRINKMAN

Frogmen have a new job in Gulf of Mexico waters: searching for oil.

Operating from a 65-foot boat, scientists turned frogmen are working in water up to 65 feet in depth. Some of the exploration is 45 miles offshore, south and east of port of Galveston, Texas. These researchers are not hunting for offshore oil in the conventional sense. Offshore drilling locations are "spotted" by essentially the same geological and geophysical methods as used on dry land. Instead, these scientists in skin-suits are using the continental shelf as a gigantic field laboratory to study sediment deposits on the gulf floor.

Aquatic diving techniques, of course, were developed for military purposes during World War II. But the oil industry is the first to put these techniques to work for an industrial purpose.

These scientists, six in number, prepared for the underwater expedition by spending a week learning to dive in the San Marcos river, at San Marcos, Texas. When they finished the course, all of them were able to pass the diving test the U.S. Navy gives its frogmen.

Most of the oil fields so far discovered in the world are what geologists call "structural traps"—underground closures formed by subterranean rock layers folding and fracturing.

Some of the biggest oil finds—the great East Texas field for instance—have been in an entirely new type of trap called "stratigraphic," which are bars or reefs formed in ancient seas by gradual deposition of sediment over the centuries. These reefs and bars are extremely hard to find by conventional methods.

Many of the big oil fields of this type have been found by pure accident. Now the oil frogmen are "combing" the gulf floor, hunting the sediment deposits that may point the way to stratigraphic traps.

While they "prospect" on the gulf floor, the frogmen collect samples of silt, sand, shells and other marine and animal and plant life. They dive, dredge and core. Sediment samples brought up by dredge are stored in steel cans, carefully labelled as to location, then sent to laboratories for analysis.

To get samples of older sediments, several feet below the present gulf floor, the scientists use a coring barrel—an eight-foot steel pipe enclosing a plastic liner—which is lowered over the site, weighted on top, and plunged into the bottom. Later the plastic tubes containing the cores are pulled out of the pipe and sent to laboratories.

Skin-diving makes it possible for these scientists literally to crawl on the ocean floor, observing all marine flora and fauna at first hand in the clear, transparent water.

They use a dandelion digger to loosen some of the specimens unbedded in the gulf floor. Photographs are taken with a camera mounted in a water-tight case.

Underwater notes are made on the spot, by writing with wax pencils on plastic plates strapped to their thighs.

Using a device called a current-meter, the divers calculate the force of underwater currents. It is very quiet on the gulf floor, according to these divers. One of them said he could hear the click of clams shutting their shells as he approached.

Occasionally, the quiet is shattered by the sound of explosions. Another oil company, making a marine seismic survey a dozen miles away, was sending columns of water into the air for heights of 30 to 40 feet.

While the men on the boat could see the water-plumes they could

not hear the blasts. However, the skin-divers could hear the explosions very clearly on the bottom of the gulf.

The skin-divers reported that most of the fish they encountered were totally unafraid. Red snapper, angelfish, sheepshead, triggerfish, and many other beautifully colored tropical fish swam up and nudged the divers' face-masks, not at all alarmed by the intruders.

Two of these geologists, strangely, were near-sighted on land. However, they reported that when they donned their aqualungs and went down to the gulf floor, the near-sightedness vanished. Instead they could see better than their companions who had normal vision.

Fall forage program to boost feed reserves

Saskatchewan farmers, especially those in the west and southwest parts of the province, would be wise to plan on sowing part of their acreage to forage crops this fall, according to R. E. McKenzie, director of the plant industry branch of the Saskatchewan Department of Agriculture.

The fall forage crop program offers two pasture and hay mixtures as well as special mixtures suited to alkali land or areas which flood periodically. All seed is available at low prices, and freight on shipments is paid by the department of agriculture.

In drier parts of Saskatchewan, the surest way to get a healthy stand is by seeding just before freeze-up in the fall. No land preparation is necessary since seed can be sown in stubble or where there is a weed cover. The stubble and weeds will hold snow which will provide moisture for germination early in the spring, getting seedlings off to a good start before hot, dry weather.

Late fall seeding should be done after October 15th. It is recommended to sow seed less than one inch deep, and in the brown and dark brown soil zones of the south and southwest hay crops should be put in 12-inch rows.

Mr. McKenzie said it was likely prices of forage seed would be considerably higher next year because of the short seed crop this season. This fact, along with the knowledge that livestock and sufficient feed reserves on the farm give security, should help farmers to decide to sow more forage crops this fall, said Mr. McKenzie.

"Just last winter we were shown by the feed shortage which developed, that not nearly enough for-

Funny and Otherwise

G. K. Chesterton was a large man, over six feet in height, weighing more than three hundred pounds. Bernard Shaw, Shaw, Chesterton's friendly enemy, was extremely thin. Meeting him one evening, G. K. told him, "To look at you, one would think there was a famine in England."

"And to look at you," Shaw retorted, "One would think you were the cause of it."

A Dallas, Texas, woman phoned her grocer and snarled, "Mr. Johns, I sent my son, Thurmond, for two pounds of grapes, and you sent me only one and a half pounds! Either your scales are crooked, or you didn't weigh these grapes."

"My scales are all right," replied the grocer. "Have you weighed Thurmond?"

"Little boy," asked the lady, "can you direct me to the bank?"

"Sure I can," answered the boy, "for a quarter."

"Isn't that rather a high price for such a little favor?" asked the lady.

"Not for a bank director, it isn't," replied the boy.

Age crops are grown in the province. It is only reasonable that on every farm one acre of grass-alfalfa mixture should be grown for every head of livestock kept."

Full information about the fall forage crop program may be obtained from Ag. Reps. municipal offices or the Department of Agriculture at Regina.

get more than just freeze-up protection...

PRESTONE BRAND ANTI-FREEZE TAKES OVER WHERE OTHERS STOP!

Corrosion in your radiator eats through metal—causes leaks. "Prestone" Anti-Freeze guards against ruinous corrosion. Are you sure with other brands of anti-freeze? Cost of repairing radiator . . . \$10.00 to \$15.00

If you had to add anti-freeze last winter, it may have been because of foaming loss. "Prestone" Anti-Freeze does not foam. Are you sure with other brands of anti-freeze? Cost of adding even 2 quarts of anti-freeze . . . \$2.00 to \$2.50

A corroded, clogged cooling system causes overheating . . . and that means excessive cylinder wear. "Prestone" Anti-Freeze allows your engine to run at proper temperatures for least wear. Are you sure with other brands of anti-freeze? Cost of re-conditioned engine \$250.00 to \$350.00

Remember these pictures when somebody tells you all makes of anti-freezes are the same!

It could be an expensive winter unless you use the anti-freeze that protects against all the cooling system hazards your car's engine will have to face. Almost any anti-freeze gives you just freeze-up protection. But "Prestone" Brand Anti-Freeze does far more . . . takes over where others stop. It conditions your cooling system, guards against ruinous corrosion, helps reduce engine wear, helps keep your car running smoothly and efficiently. So ask for "Prestone" Brand Anti-Freeze. See that you get it. And if somebody tells you all anti-freezes are the same . . . remember how much it can cost you if all you buy is just freeze-up protection!

"Prestone," "Friends" and "Prime" are registered trade marks.

This ORANGE and COCONUT CAKE is so easy to make!

Prepare
1 1/2 cups. grated orange rind
1/2 cup. cut-up shredded coconut
Sift together twice
1 1/2 cups. once-sifted pastry flour
or 1 1/2 cups. once-sifted all-purpose flour
2 1/2 cups. Magic Baking Powder
1/2 tsp. salt
Cream
7 tbsps. shortening

Gradually blend in
1 c. granulated sugar
Add, part at a time, beating well after each addition
2 well-beaten eggs
Stir in grated orange rind and coconut.
Combine
3/4 c. milk
1/2 tsp. vanilla

Add dry ingredients to creamed mixture alternately with milk, combining after each addition. Turn into greased 8-inch square cake pan, lined in bottom with greased waxed paper. Bake in a moderate oven, 350°, 50 to 55 minutes. Frost cold cake with Orange Butter Icing.

You get lighter, more delicious baked goods when you use MAGIC Baking Powder. Dependable MAGIC protects all your ingredients. Buy MAGIC today!

To Seek Liberal Nomination

Gordon L. Burton, farmer and rancher at Claresholm announced at the week-end that he will seek the Liberal nomination in Macleod federal constituency at the Liberal convention which is planned for November 19 at the Elks

hall at Fort Macleod. He is the son of the late Fred Burton, a pioneer cattleman who came to Alberta from Ontario in 1888. He was born at Claresholm in 1916 and spent his school days there, then he went to the University of Alberta to take agriculture and then to Iowa State College to take his doctors degree in agricultural economics.

Card of Thanks

The members and executive of the Coleman Canadian Legion wish to thank all those fine people who bought Wreaths and Poppies and supported our Remembrance Day Ceremonies.

A very special vote of appreciation is extended to all of the following for their fine assistance and co-operation: Rev. R. MacAulay, Mayor F. Aboussafy, Mr. D. Young, Mr. J. McDonald, Rev. F.A. Dykes, R.C.E.M.E. Color and Firing Party, R.C.E.M.E. Honor Guard, Mrs. G. Cousins and all members of the Choir, Roxy Theatre and staff, Grand Union Hotel and Coffee Shop, Bandmen J. Lowe and H. Parkinson, Pipe Major J. Moore and A. Galbraith, Coleman Cub Pack and Cadets, Coleman Journal, Coleman Sports Association and Mr. E. Montalbetti, Coleman Hardware, The Ladies Auxiliary and Legion members and Polish Combatants who so graciously gave so much time and effort.

To ALL our Most Heartfelt Thanks. If anyone has been left from this list, our sincere apologies.

COLEMAN CANADIAN LEGION, No. 9

From 1939 to 1941 he was with the Canadian Department of Agriculture and from 1943 to 1945 with the Department of Trade and Commerce. He taught agricultural economics at the University of Saskatchewan from 1945 to 1947 and at Macdonald College of McGill University from 1947 to 1951.

In 1951 he returned to Claresholm to farm and ranch. He is a member of the Alberta Wheat Pool and a vice-president of the Western Stock Growers' Association. He is married to Jean Stafford of Edmonton, granddaughter of William Stafford who came out from Nova Scotia to Lethbridge in 1881 to manage a coal mine. They have four sons.

Red Cross Sends Aid To Hungarian Refugees

The Canadian Red Cross Society has cabled \$10,000.00 in Canadian currency to International Red Cross authorities in Vienna to assist in providing emergency relief for an estimated ten to fifteen thousand Hungarian refugees who escaped to Austria prior

to Soviet reinvansion. This amt. is in addition to the \$40,000.00 shipment of drugs and medical supplies which reached Vienna last Thursday.

The Society has been informed by its Vienna representatives that over 200 tons of urgently needed medical and hospital supplies have been delivered to delegates of the International Committee of the Red Cross in Budapest and have been distributed in Hungary in accordance with traditional Red Cross policy. Delegates of the Red Cross International Committee, the neutral intermediary of the International Red Cross in time of conflict, are remaining in Hungary and it is hoped to resume despatch of Red Cross aid to needy Hungarians within the next few days.

The Canadian Red Cross Society will continue to accept donations for Hungarian relief at any of its branches on behalf of the Canadian Hungarian Relief Fund and will issue receipts which are valid for income tax purposes.

Letter to the Editor

926 - 18th Ave NW
Calgary, Alta.

Nov. 5, 1956.
Mr. T. Holstead,
c/o Coleman Journal,
Coleman, Alta.

Dear Sir:
Please enclosed find the money order to cover my subscription on the Journal for the next year. I sure look forward to it coming as it keeps me in touch with all. I am not keeping very good. Had another 2 weeks in bed under Drs care, but am up again. Wish to say hello to all the folks there. Thanking you.

Yours truly,
Mrs. Florence Pearl.
